

## Where To Find FactoryFloor Documentation

For important information about **using FactoryFloor**, read the Release Notes enclosed in this package.

For details on **OptoControl commands**, highlight the command in a block or list and click Help or press F1, or see the *OptoControl Command Reference*.

See the **FactoryFloor Glossary** in the OptoServer binder for definitions of terms.

For help in using **OptoUtilities**, see the online Help file in each utility and the Troubleshooting appendix in the *OptoControl User's Guide*.

If you have used Opto 22's **Cyrano control software** and are moving strategies to OptoControl, refer to the online file "Tips for Cyrano Users," available in Adobe® Acrobat® PDF format from the Help→Manuals menu item in OptoControl. This file contains important information about file conversion.

If you are using **PCI-ARCNET adapter cards**, see the online file "FactoryFloor PCI-ARCNET Addendum," available in Adobe Acrobat PDF format from the Help→Manuals menu item in OptoControl.

Do you have questions or comments about the FactoryFloor manuals and online help? We'd appreciate your suggestions. E-mail us at:
