Opto 22 Sponsors eSight Energy's U.S. "Energy Management Road Shows"

Chicago, Philadelphia, Los Angeles, and Houston events highlight energy monitoring and analysis in improving building energy efficiency.

Temecula, CA – March 20, 2012 – Industrial automation manufacturer Opto 22 is sponsoring eSight Energy's U.S. "Energy Management Road Shows," a series of live events exploring the role of power monitoring and energy analysis in improving building energy efficiency. At these events, facility managers and others responsible for managing energy use can learn how eSight Energy's energy analysis software, used in conjunction with Opto 22's OptoEMU Sensor energy monitoring appliance, can help facilities reduce consumption. Energy Management Road Show attendees can also examine real-life case studies to discover techniques to effectively manage energy usage, network with industry professionals, and share ideas for implementing energy management programs.

Bob Sheffres, Vice President at Opto 22, said, "Opto 22 has worked closely with eSight Energy to have our OptoEMU Sensor energy monitoring appliance deliver power data to eSight's energy analysis software, and we're looking forward to participating in and sponsoring eSight Energy's upcoming Energy Management Road Shows."

Brittany Streiner, Business Development Coordinator at eSight Energy and Organizer of the Energy Management Road Shows, said, "Having Opto 22 at our Road Shows will be a great opportunity for guests to not only learn about the eSight energy management suite, but also to see how we integrate seamlessly with the OptoEMU Sensor. The joint offering creates a full end-to-end solution to help facility managers reduce their energy usage and achieve ROI in less than 12 months."

eSight Energy's U.S. Energy Management Road Shows will be held throughout 2012 in Chicago, Philadelphia, Los Angeles, and Houston. The next Energy Management Road Show will be held in Chicago on May 30th; to register for this or other upcoming Road Shows, visit www.eSightenergy.com/RoadShows.

Webinar with eSight Energy and Opto 22

On March 21st, eSight Energy and Opto 22 will host a webinar to discuss how the eSight energy management suite and OptoEMU Sensors can help organizations effectively manage energy to reduce consumption, costs and carbon. Visit www.eSightenergy.com/Webinars to reserve your place at the complimentary webinar.

About Opto 22

Opto 22 develops and manufactures hardware and software for applications involving industrial automation and control, energy management, remote monitoring, and data acquisition. Opto 22 products use standard, commercially available networking and computer technologies, and have an established reputation worldwide for ease-of-use, innovation, quality, and reliability. Opto 22 products are used by automation end-users, OEMs, and information technology and operations personnel in over 10,000 installations worldwide. The company was founded in 1974 and is privately held in Temecula, California, USA. Opto 22 products are available through a global network of distributors and system integrators. For more information, contact Opto 22 headquarters at +1-951-695-3000 or visit www.opto22.com.

About eSight Energy

Developed by eSight Energy, eSight is the most sophisticated yet intuitive energy management suite available worldwide. Utilizing 100% web-enabled technology, eSight offers an extensive range of techniques for analyzing energy usage to reduce consumption, costs, and carbon by up to 30%. The suite is available as a hosted solution (SaaS) or installed to any site. eSight may be used to monitor data from virtually any energy related system including meters and loggers, building automation and control systems, production data, and data from any utility type
