# *Processor Handling Instructions*

IMPORTANT

Ensure the tabs on the back of the power supply are latched over the notches of the chassis. For complete instructions, see the *groov* EPIC Power Supplies, Converters, and Adapters Data Sheet (form 2246).

Correct Installation
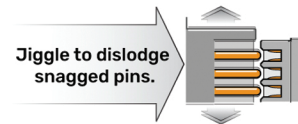

Incorrect Installation

Never handle the *groov* EPIC processor by the LCD display:

- Do NOT push or pull on the LCD display when mounting or un-mounting the processor.

- Do NOT carry or lift the processor by the LCD display.

MOUNTING

1 Pull open the LCD display using the handgrip on the bottom.

2 Align the processor's notch to the power supply's tab.

3 Slowly guide the processor to the connectors. When they touch, gently jiggle the processor until the pins seat into the connector holes on the chassis.

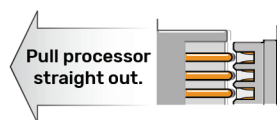

Jiggle to dislodge snagged pins.
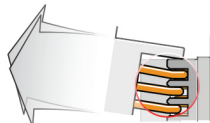

Do NOT rotate or rock.

4 Push the processor (not the LCD display) all the way in.

UN-MOUNTING

1 Pull open the LCD display.

2 Power off the unit and remove the retention screws.

3 Hold the processor by the body with both hands.

4 Pull the processor straight out.

Pull processor straight out.

Do NOT rotate or rock.

For more detailed instructions, see "Mounting the *groov* EPIC Processor" in Chapter 3 of the *groov* EPIC User's Guide (form 2267).

You can also watch a video that explains how to mount the *groov* EPIC processor by scanning the following QR code with the camera on your mobile phone:
